

# Zimbra Collaboration Suite

Leveraging the strength of the open source philosophy  
*to innovate enterprise communication.*

In today's dynamic business environment we rely heavily on the internet for information dissemination. FirstNet's Zimbra Collaboration Suite (ZCS) hosted solution solves the challenges facing today's organization.

ZCS provides an innovative experience designed to manage large inboxes, works with all desktops and devices, significantly reduces administration complexity, and is an open technology platform which easily integrates your mission critical services.

ZCS is a complete messaging and collaboration Server with an AJAX Web Client. It features Email, Contacts, Calendar, Documents, Instant Messaging, Tasks, plus synchronization to other desktops and devices.

## Key Benefits

Rich browser-based AJAX interface with application-like features such as drag and drop, tagging and conversation views.

Comprehensive search, including within attachments, and saved search folders.

Share and collaborate any application with peers: inboxes, contacts, calendars, documents and tasks.

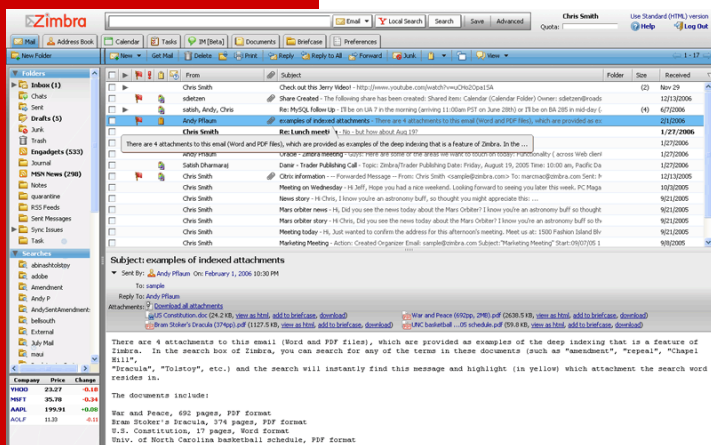

Enterprise calendars with shared free-busy times.

Zimbra Desktop enables offline access to the Zimbra web experience on Mac, PC, and Linux desktops and aggregates Yahoo! Mail, Gmail, AOL, Hotmail, and other POP / IMAP accounts.

Sync Yahoo!, Gmail Address Book and Calendar.

**From as little as R30 per mailbox the Zimbra hosted offering brings you all the collaborative features of other enterprise class email servers at a fraction of the cost.**

|                               |                    |
|-------------------------------|--------------------|
| 1 – 9 users                   | 30 per mailbox     |
| 10 – 24 users                 | R27.50 per mailbox |
| 25 – 49 users                 | R25 per mailbox    |
| 50 – 74 users                 | R20 per mailbox    |
| Once off setup fee of R500.00 |                    |
